

During trying times it is more relevant than ever to promote equity and social justice for all. Black History Month presents the opportunity for us to highlight, learn, and grow as a community. This isn't a month long tribute but rather something we embrace daily - recognizing the people of color who help make up the fabric of our culture.

Family Service League rejects racism, prejudice, and intolerance on every level. Every day, we provide human services for all, including mental health counseling, housing, addiction prevention & treatment, crisis care, early education, and family & senior services. We offer critical safety-net programs for anyone in need.

*Thank you!*
